DataViewer is the smartest way to manage business critical digital documents

Are you looking for a smart electronic document management solution (EDMS) to satisfy your compliance requirements?

DataViewer helps protect $100bn's of mission critical infrastructure to businesses across the globe.

Why choose DataViewer?

Packed with modern features, no unnessecary whistles & bells, & only pay for what you use

Web Interface for Browsers

Supports Latest CAD Formats

Easy Disaster Recovery

Database Support

Single Sign On Security

Easily Customisable

Concurrent Licensing

Control Policies

DataViewer Features

Discover DataViewer features that will revolutionise the way you store, share and manage critical data in your organisation

✓ **Access** and **manage** technical project based documents from a central repository through your web browser

✓ **Drawings** can be quickly located and are never lost or misfiled

✓ There is always strict **version control** so that there is never any doubt 'who has got what' and if all modifications and amendments have been incorporated

✓ A drawing's **links** to other references, templates and files are fully protected in the case of document modification or deletion

✓ **Share** documents and drawings on the web, **control versions**, **view** and **mark-up** documents without the need for the native file application

✓ **Reference files** are also managed by DataViewer without requiring a third-party application

✓ Project files are stored in their **native file format**, for easy document integration with legacy **ERP** and **Mapping** systems

✓ High **search functionality** is facilitated by rich metadata tagging, plus ability to search within documents, even drawings!

✓ **Compliance** and **legislative** requirements for document storage are scrupulously met

✓ **File compression** is automatically applied to files when checking out, downloading, or viewing documents thus maximising performance of data transmission

✓ **Configuration** changes can be made easily by the desktop administrator and be automatically published out to the web interface

✓ **SSL** capabilities

✓ URL links back to specific document sets for easy **life cycle processing**

✓ **Automated** user **login**

✓ DataViewer simply stores files into pre-configured file share locations accessible to the user only through DataViewer. Files are not stored inside the database (as a binary object) or inside vault, instead **the native file is always the native file**

How can DataViewer help you limit lost time and increase productivity?

Our distributors work with you to create the best technological solution

We define requirements, assess gap analysis and implement with training

Effective preparation, design and management of technology implementations is key

We minimize manual indexing to ensure your legacy documents are easily accessable

Global support through local distributors by phone, on-site and email. Additional support available

We can offer train-the-trainers and end-user training programs to ensure your success

Which **industry** are you in?

DataViewer is utilised daily across 31 countries, by a range of private and public sector clients

Architectural

International engineering companies in the building and rail industries already rely on DataViewer every day for checking key details, updating files, and keeping projects on track.

Construction

From ship building to managing air traffic control and aviation, keeping documents managed and maintained is DataViewer's key objective with the ability to quickly recall and display various files.

Energy

DataViewer keeps expanding as we continue our support of global renewable resource companies and pipeline distributors across large parts of the greater Southern Africa regions.

Engineering

CAD and Engineering file management lies at the heart of the DataViewer system, and as such we serve clients from international aerospace, to defence and security.

Manufacturing

DataViewer systems support defence manufacturing in Turkey, chemical plants in USA and EU, power generation products and the largest industrial manufacturing company in Europe

Municipal

Software trusted and utilised by the US Department of Defence, The Australian Department of Defence, South African District Municipality and Central Applications Offices.

Oil and Gas

Supporting the infrastructure systems of oil pipelines in USA, oil Refineries in the Netherlands, a Canadian full-service midstream provider of oil and natural gas and the Anglo-Australian multinational metals and mining corporation.

Transportation

Implementation in International Airports in the UK and Australia, railways in the USA and Indian regions, and file management systems for a multinational rolling stock manufacturer and global diesel engine facilitator.

Utilities

Various service provides trust DataViewer with their engineering files, from water utilities across Africa and Asia, to German tech companies, African paper and sugar distributors, and an Australian mining giant.

## Brands from around the world relied on DataViewer for their document management

babcock · Cummins · SIEMENS · RioTinto · ALSTOM

airservices · GE · CLARIANT · Australian Government Department of Defence · PETROTECH

sappi · TRANSNET · WOLF MIDSTREAM · THE UNIVERSITY of ADELAIDE · People's Choice Banking for life · UMGENI WATER-AMANZI

mondi · RES CORPORATION · C-A-O · AMATHOLE DISTRICT MUNICIPALITY · NedZink · &more...

★ ★ ★ ★ ★

"Being able to drill down has helped staff who are not used to the assets to locate the exact document they require without needing to know the drawing number."

Mauro Bonifazi
The University of Adelaide

Why upgrade?

There are many reasons to upgrade your existing licenses of **DataViewer**, here are a few...

Database Support

DataViewer supports the leading and latest database formats including Microsoft SQL Serverand Oracle Databases.

More Power and Improved Security

With a full 64-bit application users can be configured to access DataViewer using Single Sign On that ensures only authorised users have access.

Updated CAD Formats

DataViewer 16 includes support for the latest CAD formats. View, print and markup CAD files.

"Now we can locate the document in our database in seconds and just click edit and the document opens in AutoCAD for editing. We no longer need to search directories, subdirectories and drives hoping we have found the latest version."

Michael Loucas, Loucas Zahos Architects
